Yavaran Tabiat Chenaran

Yavaran Tabiat Chenaran Company was established in 1397 (2018) with the goal of innovating in the production, processing, and packaging of the finest new agricultural products, and meeting various needs of the domestic and foreign food industries in this field.

Product Range and Supply: The company produces and offers more than 30 types of premium products, meeting the needs of over 1,000 commercial and industrial units, hotels and restaurants, hospitals, and factories in the country. It also engages in sanitary packaging, extensive distribution, and export of special food products to other countries. This is a testament to the management's prudence, effort, and initiative, and the participation of specialists and employees, which has brought the company credibility and professional reputation.

Facilities and Development: Initially, Yavaran Tabiat Chenaran Company started its activities by establishing saffron farms, orchards of plums, pistachios, barberries, and factories and cold storage in Nishapur and Torbat Heydariyeh, continuing in the Binalood Industrial Estate and Tehran. With the development of activities and products, and the expansion of **orchards, farmland, and factory space, today the company spans over 100,000 square meters in 5 separate sites. These sites include production halls, product warehouses, advanced cold storage, a dedicated weighbridge, laboratories, and orchards with new breed seedlings.** They are equipped with the most advanced digital processing and packaging machinery, a product quality control laboratory, and a skilled workforce, all operating according to international standards and the health apple standard.

Saffron, (scientific name: **Crocus sativus**), is a plant from the iris family and is the most expensive, best, and most fragrant spice in the world. It is used in cooking and medicinal applications. The unique aroma and flavor of saffron are due to a compound called **Safranal**, and the golden yellow color it imparts to food is due to a compound called **Crocin**.
